

Koenigsegg Automotive AB

Job Description Head of IT

Job title: Head of IT

Work Location: Ängelholm

Division/Department: IT

Report to: CEO

Full-time
 Part-time

Exempt
 Non-Exempt

Essential Duties and Responsibilities:

We are looking for a highly skilled IT Manager that wants to be part of an exciting journey ahead. As the IT Manager you will be responsible for building an internal IT organization for the Koenigsegg Group. You will also be responsible for overseeing and ensuring that computing systems and equipment are operating effectively and efficiently. Together with our external IT- support, Diflex, you run the daily operations, such as coordinating technology installations, upgrades and maintenance. You will also work strategically to create and implement a strategic plan to optimize the needs of the organization. You will be a part of the Management Team of Meneko and Koenigsegg Automotive.

Skill Requirements:

- Education in technology, computer science, software engineering or related field.
- Proven experience managing IT infrastructure and services.
- Equivalent experience within the same field of expertise.
- Proficient in computer hardware, cabling installation and support, wireless technology applications and interface, and IT security.
- Good communication skills in both verbally and written in English and Swedish
- Management and leadership skills.
- Multi-tasking and time-management skills, with the ability to prioritize tasks.
- Excellent analytical and problem-solving skills.
- You are genuine interested in IT and Technology development.
- Driver's license

Deliverables:

- Lead various IT projects.
- Responsible for the IT structure.
- Specify IT landscaping together with Diflex when needed.
- Specify sharepoint & teams platform and possible other collaborations platforms.
- Specify IT routines and user rights.
- Assuring all IT activities are performed within the parameters of applicable laws, codes, and regulations.
- Overseeing the annual IT budget and ensuring cost effectiveness.
- Gather user inputs and performance reports for operating systems to improve the IT structure.
- Evaluating technology risks and a create a recovery plan and backup procedures.
- Remaining up to date with advances in technology and industry best practices.
- Act as a first line support on site when Diflex isn't available.
- Be the main contact towards our external IT Diflex.
